

DH200

Data taken 7/19/2025

Weight of the amp: about 25 pounds.

Nominal Performance: 100 Watts Per Channel Stereo Amplifier

Has new power supply caps, 22,000 uF 80V, upgrade from the originals.

Power Supply voltages +/-61 Volts DC, measured at main filter caps.

RMS Ripple on filter caps, with idle amplifier, 60 mV on each main cap.

Idle current , each channel– 268 mA and 239 mA

Power output- 1 kHz, 1% distortion, 8 Ohm load, single channel driven, approximately 136 Watts.

Distortion – 1 kHz, 117 W into 8 Ohms, single channel driven, THD -89 dB

Distortion – 1 kHz, 115 W into 8 Ohms, single channel driven, THD -88 dB
